

Project Manager

Overview

At Diamond C, our purpose is to fuel the growth and success of our team-members, customers, and community abroad. We're committed to more – more process improvements, more sustainable manufacturing, and more opportunities for our team. Responsible for ensuring key projects result in EXTRAordinary results while achieving development roadmap commitments. This position will lead multi-disciplinary programs teams while also mentoring, guiding, and supporting development leaders in the achievement of departmental project goals. Will be responsible for projects ranging from new product introductions to full facility launches. While this position will be focused mainly on projects regarding Engineering Development and Operations Excellence, this individual will collaborate on projects throughout Diamond C.

This position is located in Mt. Pleasant, Tx.

Responsibilities:

- Will drive the design, launch, and continuous improvement of Diamond C Project Management standards. Including best practices, processes, templates, tools, and reporting mechanisms.
- Is hands-on with cross functional development teams to ensure they successfully utilize standard Diamond C Project Management processes.
- Maintains metrics for "on-track performance" throughout all project life phases.
- Key stakeholder involved in setting annual development roadmaps.
- Ensures program roadmap performance through analysis of milestone risk and identification of problem areas. Maintains high-level program on-track / off-track status.
- Updates management, and executive leadership on project status and when appropriate drives discussion around organizational re-prioritization to ensure deliverables.
- Directly Leads Projects from initial requirements setting through post-launch validation.
- Champion for effective Project Management standards throughout the Diamond C Organization.

Qualifications:

- Bachelor's degree
- Minimum 5 years working in a continuous improvement, engineering development or manufacturing environment.
- Minimum 3 years of experience in Project / Program Management.
- Hands-on leader who has proven success building and implementing processes, not only following previously established practices.
- Exceptional Communicator with experience collaborating across silos and organizations.
- Strong analytical skills and business acumen.
- Experience in the following desired but not required: Large Scale Facility Engineering, Production Line Engineering, Multi-disciplinary Product Development.
- Proficient in Program / Project Management methodologies, processes, and tools.
- Project Management Institute (PMI) accreditation (highly preferred).
- Familiarity with Agile or Scrum Project Management methodologies (preferred).
