IT Data Analyst

A little bit about Diamond C:

Founded in 1985 by Kim and Mike Crabb, Diamond C has grown from a small, local manufacturer to a 800+ team members strong company. Today, Diamond C is still a family-owned and operated company in Mt. Pleasant, TX, Diamond C continues to strive to produce innovative, feature-rich custom trailers while promoting the well-being and success of its team members, customers, and community abroad.

About the Position:

The ideal IT Data Analyst would be to help with operational reporting and key performance indicator (KPI) measures for Diamond C Trailers. We are looking for someone with the passion for data analysis and the drive to usher our business into a new modern cloud era! We are looking for someone that wants to gain a deep understanding of the trailer manufacturing process, so that they can help guide operations to use metrics they didn't even know existed!

Diamond C is seeking an individual for the IT Data Analyst position that has the ability to start with a business problem and provide recommendations on what data and visuals will help guide them in the right direction! If you have equal passion for data and teaching folks how to use the data and reports you provide, this job could be for you!

This role is located in Mount Pleasant, TX 75455 (2 days on-site, 2 days WFH) located in Mount Pleasant, TX 75455 (Relocation assistance provided).

Required Skills:

- 2 years of report writing experience.
- 2 years experience in SQL (Oracle DB2 preferred). Fluency in writing SQL queries from scratch, creating stored procedures, creating views, and so forth.
- Ability to manipulate complex datasets into simple visualizations for operations.
- Documentation skills to annotate code and create business-use guides for reports created.
- Learner willing to research and keep up with the latest and greatest ETL/reporting tools.
- Maintain data integrity and certify business reports for accuracy through testing and validation.
- Ability to interface and communicate with all levels of employees, from welders to C-level executives.
- Excellent communication skills. Both verbal and written.

Desired Skills:

- Database maintenance experience (Oracle DB2 preferred). Experience in managing table security permissions and performance analysis tools.
- History using Data-Visualization Software such as Tableau, MS PowerBI, Google Data Studio (GDS), or equivalent tool.
- ETL pipeline experience.
- Crystal Report Writer experience.
- Manufacturing experience.

Bonus Skills

- Experience with an ERP system. We use DelmiaWorks (formerly IQMS).
- Machine Learning and Big Data experience.
- Python.
- Spanish.

We encourage and welcome applicants with any and all backgrounds, experiences, abilities, and competencies. All decisions regarding hiring, promotion, discipline, and discharge are based on qualifications, merit, and the needs of the business. We are an equal opportunity employer.
