

Solutions Architect

A little bit about Diamond C:

Founded in 1985 by Kim and Mike Crabb, Diamond C has grown from a small, local manufacturer to a 900+ team members strong company. Today, Diamond C is still a family-owned and operated company in Mt. Pleasant, TX, Diamond C continues to strive to produce innovative, feature-rich custom trailers while promoting the well-being and success of its team members, customers, and community abroad.

Diamond C has grown its workforce by ~30% in 2022, and we're still rapidly expanding! There are near-endless opportunities for growth and leadership positions as we continue to expand. A spin-off company and two expansions are already planned for 2023. We're offering stable employment and a great chance at advancement!

What to Expect:

Current Technologies: Google Data Studios, Google BigQuery, DB2 SQL, Talend (Stitch), Tableau, Quickbase, Python, Monday.com, Scrum Methodology

Upcoming Projects:

- Best-in-Breed Software Implementations.
 - New HRIS System, Financial Reporting Software, and CRM.
 - API communication/design needed for all.
- 2 Plant Expansions and ERP rollouts in each!
- New central reporting database buildout.
 - We're implementing 3+ new systems next year that will need central reporting.
 - Sandbox area for Machine Learning.
- Container Deployment Design

About the Position:

The ideal IT Solutions Architect would provide ERP support and guidance for Diamond C Trailers. We are looking for someone with the passion for working with people and the technical know-how to recommend solutions to them. We are looking for someone that wants to gain a deep understanding of the trailer manufacturing process, so that they can help guide operations to solutions and technologies they didn't even know existed!

Diamond C is seeking an individual for the Solutions Architect position that has the ability to start with a business problem and provide recommendations on what technologies or processes will solve their issue. Solutions Architect will play a large role in building & supporting business unit alliances around a stack of applications. If you have equal passion for technology, code, and teaching folks how to use the wonderful things you will help build this job could be for you!

This role is hybrid (2 days on-site, 2 days WFH) located in Mount Pleasant, TX 75455 (Relocation assistance provided).

Required Skills:

- 3-5 years of ERP experience, either as a software developer or a solution architect.
- 2 years experience in SQL (Oracle DB2 preferred).
- Passion for learning new technologies!
- Ability to investigate a problem to its root cause to find the right solutions.
- Documentation skills to annotate code and create process documentation
- Learner willing to research and keep up with the latest and greatest software and technology tools.
- Experience working with third-party consultants.
- Ability to interface and communicate with all levels of employees, from welders to C-level executives.
- Excellent communication skills. Both verbal and written.

Desired Skills:

- Database maintenance experience (Oracle DB2 preferred). Experience with performance analysis tools.
- History using Data-Visualization Software such as Tableau, MS PowerBI, Google Data Studio (GDS), or equivalent tool.
- Experience with implementing new software solutions.
- ETL pipeline experience.
- API experience.
- Crystal Report Writer experience.
- SQL optimization.
- Manufacturing experience.

Bonus Skills:

- History using the DelmiaWorks ERP system.
- Machine Learning and Big Data experience.
- Python.
- Spanish.

We encourage and welcome applicants with any and all backgrounds, experiences, abilities, and competencies. All decisions regarding hiring, promotion, discipline, and discharge are based on qualifications, merit, and the needs of the business. We are an equal opportunity employer.
